

The combinatorial chemistry revolution : sustaining a superior performance position through technological learning

Citation for published version (APA):

Malo, S. (2003). *The combinatorial chemistry revolution : sustaining a superior performance position through technological learning*. [Doctoral Thesis, Maastricht University]. Universiteit Maastricht. <https://doi.org/10.26481/dis.20031015sm>

Document status and date:

Published: 01/01/2003

DOI:

[10.26481/dis.20031015sm](https://doi.org/10.26481/dis.20031015sm)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

**THE COMBINATORIAL CHEMISTRY REVOLUTION.
SUSTAINING A SUPERIOR PERFORMANCE POSITION THROUGH
TECHNOLOGICAL LEARNING**

STELLINGEN

Stéphane Malo

- 1. There is absolutely no doubt that the Netherlands truly deserves its reputation as a tolerant, open nation.**
- 2. Given that a minimum of 200 drugs discovered by combinatorial means will certainly reach the market, and given that a single drug costs an estimated \$US 803 million, it is rather puzzling that combinatorial chemistry has never been studied by scholars of technological change.**
- 3. In many respects MERIT was a perfect microcosm within which to study Canadians.**
- 4. Writing a PhD thesis was a challenging, enriching experience. But I would rather mop the floor in a peep show than write a second one.**
- 5. Siamese twins like to travel in the UK. It is because the other one can drive.**
- 6. I wished the defense of this thesis took place in Las Vegas. You pay 50 bucks and then get your diploma.**
- 7. Combinatorial chemistry is not just a numbers game.**
- 8. What is the difference between a Dutchman and a canoe? The canoe sometimes tips.**
- 9. What is more painful than writing 8 stellingen? 9 stellingen!**
